

One of the biggest achievements for a homoeopathic doctor is reaching a comprehensive understanding of his patients so that he can find a simillimum for them. And this is where the importance of case-taking comes in. Dr. Dinesh's *scientifically intuitive case witnessing* process (a uniquely designed case taking model) helps a homoeopath reach the deepest core of the patient with relative ease. The entire process is completely *scientific, human-centric, simple, and reproducible*. Furthermore, anyone, be that a traditional classical homoeopath or a contemporary classical homoeopath, can make use of the CWP with ease and success.

In this book, you will find (with case examples):

- Exploration of **the connecting thread that runs through** the myriad of homeopathic approaches, ranging from the **traditional Hahnemannian approach to the contemporary classical era**; ultimately, Dr. Chauhan unites them in a comprehensive vision
- The **A to Z of the Case Witnessing Process (CWP)**: Introduction, importance, aims and objectives
- The **Three fundamental Steps of the CWP**: *Passive, Active, and Active-Active CWP* (Importance, Application, as well as pointers for progressing from steps 1-3)
- Possible obstructions one may face, and the appropriate **techniques of case taking**, such as *Denial, Projection, Dissociation, Internal witnessing, etc., etc.*, to tackle such obstructions in a case and pointers that help one know *WHICH* technique to use *WHEN*
- A study of *WHEN, HOW and WHAT* **healing awareness** takes place **in the patient during the case interview**
- A path-breaking concept: **"Healing the Healer"**. The therapeutic effect of the CWP on the healer
- Numerous **sketches of hand gestures** made by patients, drawings that bring to life the illustrative cases presented in the book

The X-Factors of the Book: OOMPHOO

Oomphoo is a delightful new element in this book. Co-author of this book, Oomphoo is a comic character who is the reader's friend, as well as a commentator on--and critic of--Dinesh's work. Oomphoo makes comments throughout the book. His remarks are designed to prompt the reader to think more deeply about the points being explored by Dr. Chauhan and to do so in the context of joy and laughter.

"This new book from his now seasoned hand, is a delight to read, for it is clear and insightful, and carries the reader along to remember perennial truths" **(From foreword by Misha Norland)**

"...profound insight explained in a simple way and presented systematically." **(From foreword by Harry van der Zee, Editor-in-chief of Homœopathic Links)**

This book is not mere add-on theory to existing books on homoeopathy; rather, it is the result of Dr. Chauhan's quest to understand the nature of human beings in their completeness. Dr. Chauhan has made the case witnessing method accessible to anyone who wishes to effect a cure in the central disturbance of a patient. Reading this book will surely give every reader the feeling, "I can do it!"
